## User journey

A GESTURE BASED TOOL FOR STERILE BROWSING OF RADIOLOGY IMAGES

Team ID: PNT2022TMID32149

Time 30 min

Difficulty Beginner

High-level steps your user needs to accomplish from start to finish

working of the system and camera

Open the website and

Test the correctness of the output

## 2 Steps

Check whether the system is or not

gestures are

Interface must be

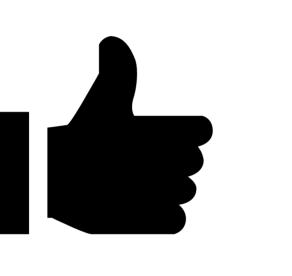

friendliness

Perform respect to the of the image to Gestures

Tune the parameters if needed

## **B** Feelings

feeling at the moment

System is ready to be used

launch perfectly

Ul is just awesome

Attractive

Gestures are displaying properly on the screen

Will the

captured

correctly?

according to

properly

see the accurate output

Predict the

Correct

image

What if the misbehaves?

Confused about the camera quality

about the

Reliability

gestures be

Will the system performs in bad lightings?

Anxious about the wrong predictions if
